Subject: Re: Error in Motorcycle Inspection Notification Recently Mailed

Steve,

Although a bit confusing, the letter content is correct. You do not need any sticker on your plate (just like with any auto), so you should remove inspection and/or registration stickers.

Ride Safe.

Hi Lori,

I and many motorcycle owners in NJ received notification from the MVC that we are to remove our registration decal and that the motorcycles no longer require inspection.

I may be wrong, but did they mean to say that we should remove the inspection decal and not the registration decal? After all, the registration decal serves to prove we have paid our registration fees and have insurance.

While I would hate to cause the state to incur the cost of another mailing, as it stands now the MVC has instructed all motorcycle owners, in writing, to remove the registration stickers.

Sincerely,

Steve George
